

Product: AquaErase (ASIN B0DYBTHTZR)

Dear Amazon Seller Performance Team,

I am submitting this appeal regarding the classification of our product, AquaErase.

AquaErase is an aquarium water treatment product intended for use in freshwater and saltwater aquariums. The product is designed to support aquarium water clarity and aquarium ecosystem maintenance.

AquaErase is not classified as a hazardous chemical, pesticide, or regulated dangerous good. The product:

- is non-flammable
- is non-corrosive
- is non-toxic when used as directed
- does not contain compressed gases
- does not contain reactive or combustible materials
- is not classified as hazardous under standard consumer chemical transportation guidelines

The product is packaged in small consumer-use quantities intended specifically for aquarium hobby use.

Additionally:

- the product does not alter pH or water hardness
- the product is safe for aquarium fish and coral when used as directed
- the packaging includes consumer safety instructions and warnings appropriate for aquarium products

We respectfully request a review and correction of the product classification so the listing may remain active and properly categorized.

Please let us know if any additional documentation is required.

Thank you for your time and consideration.

Sincerely,
Infinity Aquatics Co.
